## **BSP CELEBRATES COMPLETION OF DEPO PHASE 1 CAMPAIGN**

Brunei Shell Petroleum Company Sendirian Berhad (BSP) celebrated the completion of another successful exploration and appraisal programme in the Seria oilfield with a doa selamat and thanksgiving ceremony on Tuesday, March 6, 2012, at the T-201 rig site in F-32, Anduki, Seria.

Present at the event were Yang Mulia Pg Abdul Wahab Pg Hassan, Commissioner at the Lands Department, the Ministry of Development, Yang Mulia Hj Mohd Jamil Hj Mohd Ali Surveyor General Survey Department, Ministry of Development, senior officers from the Energy Department at the Prime Minister's Office, staff from BSP and their business partners.

Rosli Taha, the Project Lead in BSP, highlighted the many achievements of the drilling campaign, "We are very proud because we have drilled some remarkable wells. We drilled, 22 wells, the longest reaching 2600 metres away from the coastline utilising technology developed in Brunei – many of which, are world firsts."

Shamir Salahudin, BSP Darat Asset Manager, praised the project team for their safety performance, "I want to recognize everyone in this campaign for safely drilling these wells. I also want to recognize how everyone from the various departments and companies worked together to execute the work safely and find innovative solutions to the issues that arose in the project. This has set a new standard for collaborative working. I am convinced that it's this type of behaviours, which will ensure our continued success in fuelling Brunei Darussalam's future."

In line with the company's strategy of maximising the recoverable hydrocarbons from this area, BSP will continue to expand the injection of treated produced water to support oil production. BSP believes that this technique would increase the recoverable volumes from this area. There is an added positive environmental impact as the company will be reducing the amount of water which it will dispose of into the sea.

Shamir Salahudin added "DEPO is another example of BSP and our business partners working together using innovation and technology in order to safely and economically unlock new oil and gas production."
