BSP'S DARAT GAS PROJECT AND RASAU PRODUCTION LEAD "GOTONG ROYONG" CAMPAIGN AT KAMPONG SUNGAI TERABAN

Some 150 people varying from Brunei Shell Petroleum Company Sdn Bhd (BSP) staff, residents and schools within the Sungai Teraban community participated in a "Gotong Royong" or cleaning campaign at Kampong Sungai Teraban.

The campaign is aimed to encourage students and residents of the community to work together as a team and to instil in them the sense of responsibility in ensuring a healthy and clean environment. This campaign was led by Shamir Salahudin, Darat Asset Manager, BSP.

This event demonstrates the commitment of our staff as well as the community towards protecting our environment and at the same time educate the youths on the importance of conservation, help cultivate the spirit of volunteerism and 'gotong royong' (mutual cooperation) among staff, youth and members in the local community. A large presence of the younger generation further demonstrates the increasing environmental consciousness in Brunei. BSP are keen supporters of Brunei Darussalam's efforts to promote environmental sustainability.

The cleaning activity took place at Kampong Sungai Teraban Primary School and the beach where volunteers cut grassed within the school compound, cleared block drains, picking up litter from the beach.

There are a number of legacy projects under Darat Assets of which has led to BSP to exceed its expectations with the discovery of oil from various exploration activities both onshore and offshore. One of which is the Rasau Station at Kampong Sungai Teraban.

ENDS.
